

How to Hit a Drive Serve in Badminton

What is a “drive serve” in badminton?

- (1) Stand at least 4 feet behind the service line to account for the flat angle of the serve.
- (2) Stand with your feet shoulder-width apart and have your body perpendicular to your target
- (3) Hold the shuttle out in front of your body at shoulder height.
- (4) Hold your racquet low and make sure your wrist is tilted backward.
- (5) Drop the shuttle and swing the racquet such that your wrist snaps to hit the shuttle toward your target.
- (6) Aim for the shuttle to pass over the net and not too far above the net.
